

🌱 Dr. Stone – Seed/Roots + Local Gardening Prototype

Date: 05/23/2022

🌱 Crop Examples (Left Panel):

- “The Three Sisters”
 - A classic Indigenous planting method: corn, beans, and squash
- Watermelon
- Yams
- Cool greens

🌱 Outdoor Grow List (Center Panel):

- **Moss**
 - **Cucumbers → Pickles**
 - **Tomatoes**
 - **Tilled Ground** – shows preparation of the soil bed
-

Prototype Design (Right Panel):

“Plastic Bottle Rack Tower” (*hydroponics/vertical garden concept*)

1. Tiered bottle-based grow structure
 2. Downward grow trays
 3. **Paper pulp starter trays** for **helping starters** (seedlings)
-

Design Intent:

This page visualizes both **traditional ground gardening** and **modular vertical growing** using recycled or low-cost materials—ideal for Tye's restricted environment where space and resources are limited.

Would you like this illustrated in a cleaner concept sheet or turned into part of a “**Garden Tech Tree**” for game mechanics?
